## + OVERVIEW

Today's landscape forces laboratories to accomplish more with less.

That's why it's so important to have complete control and adaptability with all your processes and to partner with a vendor who is willing to adapt to your specific requirements.

At Aspyra, our culture is transparent and collaborative to earn your business and help you grow and prosper.

As a global provider of Laboratory Information Systems for over 30 years, Aspyra (previously CCA, Creative Computer Applications) furnishes the tools for:

- **Efficient facility operations**
- **Cost reduction**
- **Revenue expansion**

Aspyra's flagship product, CyberLAB, is a comprehensive laboratory management solution uniquely personalized to fit your requirements.

It is an extremely scalable clinical information system that addresses the life-cycle of your laboratory operations from ordering to reporting and more.....

Our customers chose CyberLAB because it's both familiar and intuitive, a combination that guarantees them ease of use, integration and profitability.

## + TESTIMONIALS

Medical providers today are dealing with unprecedented reimbursement pressures. Financial survival depends on providing clients with high-quality results with responsive services.

Partnering with the right vendor can be a competitive advantage. For over 30 years, we've built an industry leading reputation for putting customers first.

Our customer-driven value proposition guides everything we offer from proven solutions to customer support and service. Understanding your business is our business. CyberLAB®, and CyberPATH® combine the feature sets you expect along with the commitment from Aspyra to improve efficiencies and drive revenue.

*"We have been with Aspyra for over 15 years, and we are a strong advocate for them.*

*Aspyra's flexibility and willingness to work with us on developing new functions we require in CyberLAB allows us to be more efficient with our workflow."*

Deb Hansen  
Laboratory Director, Christi Clinic

Kapila Jayasena  
IT Director

*“We needed a thin client-based LIS (web based) without complicated client configurations and Aspyra’s CyberLAB was it.”*

*CyberLAB has a more robust “Auto Fax” model than the industry and its easy built-in management tools help us optimize resources more efficiently.”*

Lesli J. Wilson  
LIS Coordinator

*“Aspyra didn’t engage in any haggling; they simply collaborated with us to create a solution to meet both our financial goals and state regulatory needs.”*

Carla Rose  
Laboratory Supervisor

*“Once again, Aspyra has demonstrated that they stay one step ahead of the industry and prepare us to handle the many changes taking place in the healthcare market.”*

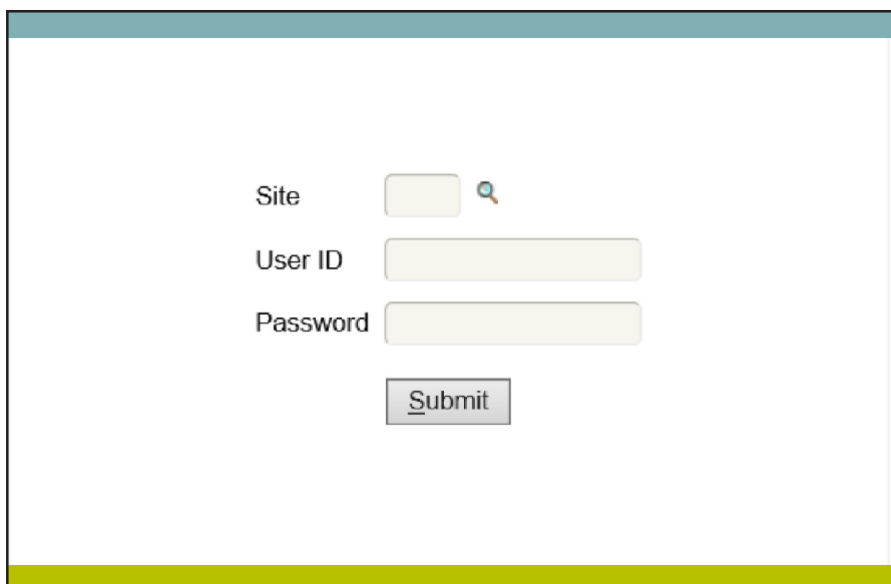

*The decision to add Aspyra’s Anatomic Pathology solution expands our service offering on the Pathology side, allowing us to share demographic information with the clinical application.*

*This provides a common history for all elements of our clients’ lab work and simplifies our approval processes.”*

# + NAVIGATION

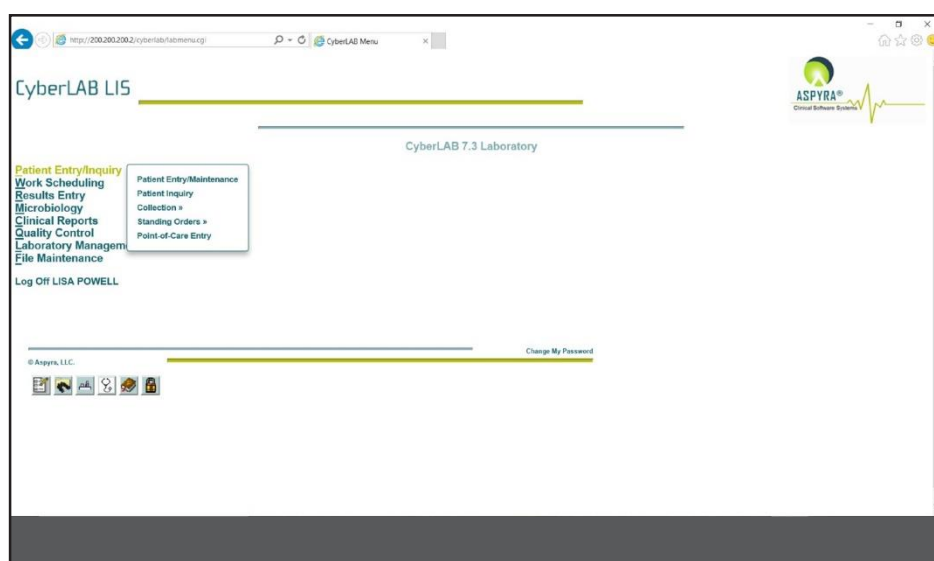

## Sign In Screen

1. User-based architecture
2. Access permission

A screenshot of a web-based sign-in screen. It features a light blue header bar at the top and a yellow footer bar at the bottom. The main content area is white and contains the following elements: a 'Site' label next to a text input field with a magnifying glass icon; a 'User ID' label next to a text input field; a 'Password' label next to a text input field; and a 'Submit' button located below the password field.

## Easy to use Drop Down Menus

Quick Launch Icons based upon your most frequented tasks, for example:

- Orders
- Results
- Reports
- Operations
- Online Help

# + NAVIGATION CONT.

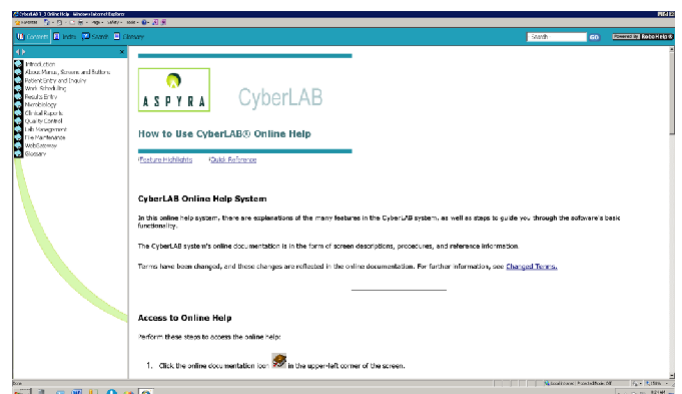

Content & layout personalized to meet your workflow needs, including a list of your most frequently run tests for consistency & productivity:

The screenshot shows the 'Demography' form in the ASPYRA system. The patient information includes Patient ID 552-44-3377, Patient Name ASPYRA, TOM, Visit ID, Nursing Str. FL-3, Room 15, Bed A, Patient Type Other, Acquiring Dr. 9998, Pains Nursing Home, Atending Dr. 00000123, WHITE, ZACK, Date of Birth 11/11/1954, Age 61, Sex Male, Race Caucasian, Street Address 12345 STREET, AVE., City LOS ANGELES, State CA, Zip Code 91202, Medicare No. 4343434343, and Insurance Type Medicare. The form also includes fields for Relationship, Responsible Party Last Name, Address, City, State, Zip, Phone, Cell, SSN, DLN, and Employer. Buttons for 'OK', 'OK - To Sample Entry', and 'Cancel' are visible at the bottom.

Fields can be customized to fit your workflow and requirement. Easy reference search function to promote consistency & productivity. Capitalize on reimbursement and reduce revenue leakage with correct billing details:

This is an identical screenshot of the ASPYRA Demography form as shown above, displaying the same patient and insurance information.

Online help to assist new hires or refresher on "how to's".

# + CyberLAB® LIS Laboratory Information System

## **Automate**

Interfacing for seamless flow of data

## **Create**

Cohesive workflows for all systems, instruments, printers, barcoding and management reports

## **Reduce**

Gaps in process, Turnaround Time and subsequent errors

## **Capitalize**

Effective use of FTEs and asset utilization

## **Prepare**

Laboratory for regulatory inspections

## **Provide**

Real time data/results to Physicians

## ONC Certification and Costs

Aspyra, LLC's CyberLAB® version 7.3.1 Laboratory Information System software has successfully completed SLI Compliance ONC-ACB EHR 2015 Cures Update Edition Certification on December 21, 2020. The CHPL Product Number and ONC-ACB Certification ID: 15.05.05.1115.ASPY.01.00.0.201221 and related certification information can be viewed by clicking the following link to the ONC CHPL website: <https://chpl.healthit.gov/#/listing/10518>

The certification was issued by SLI Compliance on behalf of the Office of the National Coordinator for Health Information Technology (ONC) in the following measures:

- 170.315.d.1 – Authentication, Access Control, and Authorization
- 170.315.d.2 – Auditable Events and Tamper-resistance
- 170.315.d.3 – Audit Report
- 170.315.d.5 – Automatic Logoff
- 170.315.d.7 – End-user Device Encryption
- 170.315.d.12 – Encrypt Authentication Credentials
- 170.315.d.13 – Multi-Factor Authentication
- 170.315.f.3 – Transmission to Public Health Agencies – Reportable Laboratory Tests and Values/Results
- 170.315.g.4 – Quality Management System
- 170.315.g.5 – Accessibility-centered Design

This Health IT Module is 2015 Edition compliant and has been certified by an ONC-ACB in accordance with the applicable certification criteria adopted by the Secretary of Health and Human Services. This certification does not represent an endorsement by the U.S. Department of Health and Human Services.

## + SUPPORT & TRAINING

### LIS Care Support Team

Aspyra prides itself in its ability to provide 24/7 support. There are various ways to contact Aspyra's dedicated Laboratory Support Team including Web Portal, email and a dedicated 800 support line

### Training Available

Training can be provided in several manners, including onsite, Remote training using GoToMeeting®.

### Maintenance Contracts

These are referred to as Service Support Agreements (SSA). The scope of the SSA includes upgrades, patches & technical support for 1, 3 and 5 yr. terms.

### Scope of Work (SOW)

These are created based upon the project and are part of the contract. The SOW streamlines the project so that it is completed on time and within budget.

## + Datasheets

A photograph of laboratory glassware, including a graduated cylinder and several Erlenmeyer flasks, set against a light blue background. The glassware is arranged in a way that creates a sense of depth. The graduated cylinder on the left has markings for 80, 90, and 100 ml. The flasks are in the foreground and background, some containing clear liquids. An orange triangle is visible in the bottom left corner of the image.

The following pages are datasheets for the laboratory products listed below:

- CyberLAB<sup>®</sup> LIS
- CyberPATH<sup>®</sup> AP
- Reporting
- WebGateway<sup>™</sup> Remote Access
- Interfaces

## One Click And You're In...

**Navigation:** Quick Launch Icons for consistency & productivity

**Workflow:** Flexible Rules-Based Technology that can adapt to your laboratory workflow

**Reporting:** Versatility of design and delivery methods for complex reporting documents

**Interfacing:** Easy to accommodate connectivity for systems/instruments/middleware

**Faxing:** Instant results upon completion or preliminary reports

**Regulatory Compliance:** ICD-10 & Meaningful Use Certified

**Remote access:** Stay connected anytime, anywhere

**Program languages:** Microsoft® C++, VB, C#; JavaScript; HTML; Micro Focus® COBOL; Perl

**Operating System:** Microsoft® Windows

**Database:** Microsoft® SQL®

**Other Features:** Microbiology, Anatomic Pathology Inventory Management and Accession Volume-based pricing

# + CyberPATH<sup>®</sup> Anatomic Pathology

CyberPATH offers current technology, comprehensive functionality, and management tools designed by pathologists and other healthcare professionals actively involved in the field to optimize workflow, efficiency and cost savings for the operations of the anatomic pathology and cytology departments.

CyberPATH tools ensure timely and accurate data acquisition and information access for physicians, pathologists, technologists, histologists and clerical staff.

## CyberPATH

- Automated Report Distribution
- Pre- Ordering of Specimens
- Reporting Templates
- Electronic Signature
- HIPAA Patient Tracking/Audit Trails
- Multi-Level, Multi-function Security
- HL7 Interfacing with HIS, CIS, EMR, etc.
- Patient History Search Tools
- Correlation Reports

# + Reporting Managing Your Operations

## Aspyra Has an Enormous Library of Templated Reports to Help Manage Your Laboratory Operations

If you can't report it, you can't measure it....

From Department, utilization, patient specific to executive reporting; all will help promote efficiency, adaptability and collaboration within your laboratory. Because our software is SQL® driven, your reporting options are endless, and puts you in the driver's seat to achieve operational excellence.

Did you know that with CyberLAB reporting...

3rd party reporting tools are supported such as:

- Crystal
- SQL

Results Reporting:

- Color coded
- Graphical
- Formatting of fonts

Historical Reports:

- Can be printed Cumulatively
- Can be sent to Primary Care Physicians

Results can be sent via:

- Fax
- Print
- Email
- Changes can be made and sent as "corrected copy"

Reports can be:

- Extracted
- Customized
- Exported into Excel
- Used with Quick Launch Icon buttons
- Ad – hoc

Delta Checks capability:

- Test definition/dictionary table

# + WebGateway™ Remote Access

## WebGateway Remote Access and Beyond...

### **Order Entry**

Commonly Ordered Tests

Group users (OB Physicians, Respiratory Department, etc.) to shorten order input time with pick lists of tests they commonly use.

### **Order Prompts and Messages**

Prevent incomplete orders!

Define test-level questions and instructions that display at Order Entry when that test is ordered (i.e. prompt for weight, height, patient fasting, etc.).

### **Order Entry Decision Support**

Route ordered tests to approved performing laboratories based on payor (i.e. HMO) without user intervention.

### **MNV Checking**

Generate waivers (ABN) for patient signature at the time of order placement, thus increasing laboratory revenue by reducing the number of write-offs performed.

### **Barcode Label Generation**

Print barcode labels to physician offices or other remote printers, which ensures patient safety by allowing the clinician to affix the label to the specimen before it is transported to the laboratory.

### **Physicians Review List**

Allows each physician to manage his or her own view of newly reported and released results.

Among the many available options, physician may choose to remove results as viewed, maintain results in their current view list, or skip for later review.

### **Online Documentation**

CyberLAB user documentation may be accessed online providing users with immediate assistance to module functionality and usage.

## Be Connected, Anytime, Anywhere

### Patient Inquiry

- Immediate access to patient results by authorized personnel
- Real-time result inquiry, abnormal result flagging
- Reference ranges, trend and graph analysis
- Clinical notes entry and view
- Secure access to patient results

### Server Hardware Requirements

Contact us for the current SRR (System Requirements and Recommendations) for the current version of CyberLAB.

AspyraCLOUD Hosted options also available.

## + Interfacing Connectivity and more...

### Connecting your laboratory to endless possibilities

Aspyra has an enormous bank of successful instrument & system installations that span over 30 years.

Our Interface Specialists have over 18 years of HL7 & ASTM protocol experience and work hand in hand with manufacturers. Because we design and implement ourselves, we can be flexible without engaging in hierarchal processes to implement interfaces while increasing your productivity and throughput.

Our R&D team will work with you to develop any unique interfaces based upon your needs and timing.

## Manufacturers

Below is a small example of manufacturers we have collaborated with for installations:

### Instruments

- Abaxis
- Biorad
- Horiba
- Abbott
- CellDyn
- Beckman Coulter
- Siemens
- J&J
- And many more...

### Systems

- E-Med
- GE
- Healthpac
- LabCorp
- NextGen
- Strateq EHR
- eClinical Works
- Siemen's
- Telcor
- And many more...

- Selected Alpha Result Single Site System
- Pending Samples Instruments
- Ordered Tests
- Patient Ordered Tests by Client
- Test Dictionary
- And more.....just ask us and we'll deliver.

## Why Aspyra?

We've had a pulse in the laboratory marketplace for over 30 years, and our culture is transparent and collaborative to help you grow and prosper. Our philosophy is real simple:

- We will develop the best of breed technology & innovation.
- We will provide products & services based upon YOUR needs, not ours.
- Software was built by lab users for lab users.
- New features come from industry trends and customer suggestions.
- We will work with your timing and budget.
- We will be your Automation Ambassadors to help improve workflow, productivity and safety.
- We will help you be successful.
- Aspyra SAYS YES, WHERE OTHERS SAY NO.....
